EXPERICENCE
the true power of IP Video

AT A GLANCE

- Established: 2007
- Location: Taipei, Taiwan
- Core business: Software development
- Main product: CMS/NVR
- More than 370 IP camera brands & 7,000 camera models listed on Community Platform
- Over 1.7 Million channel licenses deployed

Genius Vision
Company Profile

Genius Vision Company Profile

Goals & Mission Statement

Develop a strong base of key customers and become a key player in the industry.

Establish a IP video industry standard software platform that enables universal access & plug and play to all kinds of IP camera through global collaboration.
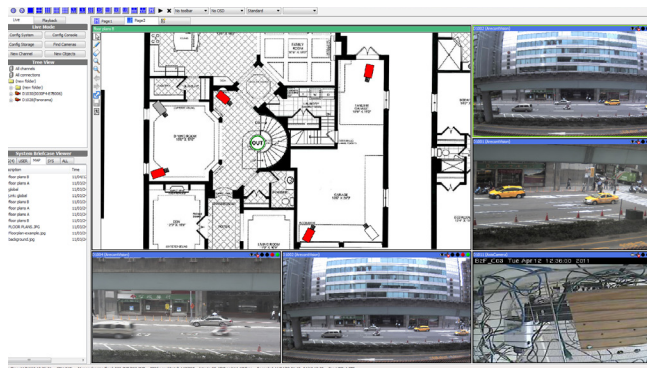

Provide the most reliable and powerful IP video management software with structured methodology.

Why Genius Vision

Our all-in-one VMS is tightly integrated, high performance, small footprint, and easy-to-use. By "All-In-One", we meant our software integrated following large feature sets into one package:

- **NVR:** Network Video Recorder. Records and search video for large amount of storage throughput.
- **CMS:** Central Management System. Manages multiple servers in multi-layer fashion. Process alarm & events. Manages devices in eMAP.
- **IVS:** Intelligent Video System. Analyzes video content in real-time. High accuracy. Multiple applications including double-tripwire detection, electronics fence, missing object, foreign object, motion detection, and tamper detection.
- **360° Panorama:** Records panorama video and see multiple angles in playback. Executes Pan-Tilt-Zoom operation in playback video.

All these subsystems are included in a single integrated package, and all operations can be done in remote client, even in the window of Internet Explorer with uncompromised feature-set.

Meet the Owner

Cherng-Yann Ing

Ing is an expert in creating and developing large-scale complex software systems. He has years of experience and expertise of product development in security industry. Prior to founding Genius Vision Inc, C.Y. has co-founded several start-up companys as technical chief, including iaSolution Inc., which was later acquired by Aplix Inc., a Japanese IPO corporation. With over 15 years of solid software engineering background and 9 years of mission critical project execution experience in large scale projects for customers including TSMC, MRT Taipei, and Taiwan Mobile, he is leader in the software industry.

Experiences

- Senior Architect of Instek Digital Inc. (2004-2006)
- Chief Software Architect of iaSolution Inc. (1999-2003) (acquired by Aplix Inc. in 2004)
- International Olympiad in Informatics 1996, silver medal.

Community Platform

A public space for sharing RTSP, HTTP, ONVIF streaming protocols.

- Fexibility & functionality
- Vast brand compatibility
- FREE for non-commercial use
- Information sharing
